08 September, 2015

To whom it may concern,

As a clearing and forwarding company in the logistics industry, we are faced with the on-going challenge of excessive paper consumption, which not only has a productivity impact, but also a financial and environmental one.

Upon partnering with Green Office in 2012, we have created a general awareness amongst all our staff of their individual impact on the environment, especially with their day to day tasks that is usually taken for granted, which was done with on-site one-on-one training by Green Office staff.

The Managed Print Service has given us a clearer view of what exactly it is we have been spending our time and money on, which enables us to make more informed decisions going forward. Green Office's personal attention to our specific needs has afforded us the ability to position the correct machine for the specific requirements, which has proven to be immediately efficient and cost effective.

Overall we have been very satisfied with the service that has been provided, and we can recommend Green Office as your partner in managed print solutions.

Please do not hesitate to contact us, should you have any queries.

Yours Sincerely,

**Sheryl Nair**

Financial Manager
